EXPERIENCE

Program Technician, Multnomah County, Portland, OR (September 2025- Present)

- Designed and coordinated qualitative analysis of focus group sessions to capture input from over 300 participants to refine Community Health Improvement Plan (CHIP) priorities.
- Coded searchable Collaboration Tool containing 450 program activities across the health department using Google Visualization API Query/SQL to increase collaboration.
- Presented key research plans, findings and project achievements to health department leadership to assure funding to maintain future CHIP related work.

Community Health Improvement Plan, Intern, Multnomah County, Portland, OR (June 2025- August 2025)

- Led a team of senior-level colleagues on a complex qualitative data analysis project to analyze 24 community assessments to understand current community needs and develop draft CHIP
- Communicated with county programs to identify assessments containing input or identify opportunities for program involvement in the development of strategies to achieve CHIP goals.
- Developed a searchable Community Assessment tool compiling community input across 24 community assessments using Google Visualization API Query Language/SQL to increase access to analyzed community input for the Health Department.

Intern, Willamette Health Council, Salem, OR (June 2024- August 2024)

- Collaborated with Community Based Organizations to hold 10-15 people focus groups to understand supports, barriers and goals for health in historically underrepresented populations.
- Coordinated preparation, set up, and tabling at weekly community events to promote the community health assessment survey resulting in over 400 responses in the first week of its release.
- Cleaned, transcribed and coded focus group recordings to identify key themes to provide cultural context for qualitative data in the Community Health Assessment.

Intern, *Marion County Tobacco Education and Prevention Program*, Salem, OR (June 2023- September 2023)

- Researched and communicated Tobacco Retailer Density in Marion County and its impacts on Youth usage and perception of tobacco products.
- Designed and created ArcGIS story map combining narrative techniques and mapping/spatial data to communicate the relationship between Tobacco Retailer Density in Marion County and youth access to tobacco products to school professionals
- Developed maps utilizing ArcGIS to visualize and communicate current tobacco retailer environment in relation to neighborhood income, proximity to schools, age and race.

Research Assistant, *Marion & Polk County Regional Environmental Scan Assessment for Environmental Health Resiliency*, Salem, OR (June 2023- August 2024)

- Researched existing literature on climate change topics including floods and vector borne diseases to better understand existing knowledge on topics in application to Marion- Polk County.
- Cleaned and Wrangled data sets from American Community Survey (ACS) and Behavioral Risk Factor Surveillance System (BRFSS) using RStudio to visualize and understand existing demographics in Marion and Polk Counties.
- Interviewed key informants, community partners and unhoused populations in order to better understand climate impacts on their work.

PROJECTS

“Healthcare Spending & Outcomes” December 2025

- Identified, cleaned and modeled healthcare spending data from the Centers for Medicare & Medicaid Services, Kaiser Family Foundation (KFF)
- Modeled health care spending and hospitalization rates to understand the correlation between features and guide recommendations for policy makers in regards to healthcare budgeting.
- Translating technical and specified findings to the general public to promote equity guided decision making and prevention focused funding.

HONORS AND AWARDS

2025 Carson Grant Recipient -

Heatherington Public Health Scholar

Salem Health Foundations Scholar
